- Agile Methodology, Time Management

## EXPERIENCE

JUNE 2015 - CURRENT

*Senior Software Engineer | Ather Energy Private Ltd. | Bengaluru, KA*

- Designed and Develop Software application using ReactJs, Redux and other web technologies for the vehicle which is tightly integrated with other system-level applications.
- Designed and Develop Mobile Application using React Native to sync data across platforms from bike to cloud to the mobile app using Firebase toolchain.
- Designed and Developed Complete navigation using Vanilla Js/ ReactJS, and Google map js Apis, from scratch on the web platform to be able to use it on our Bike's hardware with limited hardware and memory restrictions.
- Identified performance issues in the application and implemented more optimized components.
- Guided new joiners and trainees
- Worked closely with the system team and helped them develop using Go-lang and integrate their app with UI App.
- Developed Coding, Documenting and other version control systems like Git and Gitlab standards and hygiene.
- Determine system performance standards.
- Automated several everyday mundane tasks for peers and QA to speed up the process using shell scripting or microservices.
- Developed several Software and services within and for other teams to help them analyze, track and solve problems using Javascript web stack.

MAY 2014 - JUNE 2015

*Software Artisan | Function Space | Bangalore, Karnataka*

- Developed Web applications and tested them for issues.
- Developed, Tested and Maintain online Science forum community platform using PHP, Javascript, and other web stacks technologies.
- Created several applications to help users learn and play at the same time
- Learnise - complete learning ecosystem for all the students and teachers, by providing them tools like online IDEs to learn and run on the go.
- Play Physics - it is the new way to learn by playing interactive games and interactive quizzes based on science and physics concepts.
- Developed several internal multi-tier dashboards and tools to analyze, track and monitor user's data, behavior and actions.
- Worked closely with sale and product team to understand user's requirements and with Design and testing team to develop it and test it thoroughly.

JUNE 2013 - APRIL 2014

*Fullstack Software Developer | Avinashi Ventures Pvt Ltd | Surat, GJ*

- BizBrain - Developed a complete HRMS system using AngularJs, NodeJs, Highcharts, and MongoDB. It allows superiors to set and achieve the target for their junior colleagues, if not achieved, s/he can find the reason from the dashboard drill-in graphs and charts. It also predicts the future scope of your products based on the daily entry by all employees and can help business leaders to take necessary actions accordingly.
- Developed and maintained a bulk telemarketing SMS delivery system using NodeJs and AT commands and integrated the same with other applications like BizBrain for delivering and taking system related alerts and inputs respectively.
- Developer mail delivery system to fetch, update and generate reports with charts and deliver it to the respective person automatically using NodeJs, PHP and MongoDB

## EDUCATION

---

2013

*Bachelors of Engineering: Computer Engineering*

C.K Pithawalla College of Engineering and Technology, Surat, GJ

- GPA 8.05.

## ADDITIONAL INFORMATION

---

- Personal hobbies like game development and home automation
- In free time I explore and contribute to Open Source Software
