

# YOGESH JOSHI

Bangalore, KA 560102 • (+91) 8000038220 • iyogeshjoshi@gmail.com • [iyogeshjoshi](#) • [in iyogeshjoshi](#)

## Professional Summary

Staff Software Engineer with 12+ years of expertise in full-stack JavaScript/TypeScript development. Architected an AWS infrastructure redesign that cut cloud costs by 80% while improving scalability, and led delivery of enterprise-grade micro-frontend systems handling 100K+ daily transactions. Known for architectural leadership, cross-functional mentorship, and shipping complex features on tight timelines.

## Skills

- **Languages:** JavaScript (ES6+), TypeScript, Go
- **Architecture:** Micro-frontends, Webpack Module Federation, Microservices, Serverless
- **Frontend:** React, Next.js, Vue.js, Redux, React Native, GWT
- **Backend:** Node.js, NestJS, Express.js, Spring Boot, GraphQL
- **Cloud/DevOps:** AWS (EC2, S3, Lambda, DynamoDB), Docker, Kubernetes, Terraform, Mulesoft
- **Databases:** PostgreSQL, MongoDB, Redis, Firebase Firestore
- **Testing:** Jest, Cypress, Playwright, Selenium
- **Digital Adoption:** DAP platforms, Contextual fabs, In-app guidance

## Experience

**Whatfix** Bengaluru, KA |Jun 2025 – Present

### *Staff Software Engineer*

Whatfix is a leading Digital Adoption Platform (DAP) empowering organizations to guide, automate, and track user journeys across software applications.

### **Selfhelp Hub**

- Contextual fab embedded in client applications, giving end-users access to curated help articles, training videos, automations, and task assignments
- **Delivered "Tasklist" feature** within one month – enables organizations to create actionable tasks for end-users with configurable notification frequency via the fab
- Tasklist supports multiple task types: reading articles, watching videos, performing automations, and completing defined actions
- **Increased Selfhelp Hub adoption from 80% to 100%** across enterprise client base through feature enhancements and UX improvements
- **Tech Stack:** ReactJS, Micro-frontends (Webpack Module Federation), GWT, Spring Boot, Playwright

### **QuickRead**

- AI-powered query system enabling users to ask questions against all curated organizational content
- Building core agent that traverses organizational content and generates contextual, accurate responses to user queries; improving content discoverability across enterprise client base

### **Glimpse**

- In-context FAQ solution allowing organizations to define highlightable selectors on their applications; selectors are underlined with a distinctive rainbow indicator and open a modal with AI-generated answers via QuickRead
- Implementing suggested questions section that auto-populates queries in Selfhelp Hub for seamless cross-product integration

### **Team Leadership**

- Mentoring team of 3-4 engineers, conducting code reviews, and driving technical excellence

**YARA International** Bengaluru, KA |Aug 2020 – Feb 2025

### *Lead Software Engineer* (Aug 2022 – Feb 2025)

- **Spearheaded AWS infrastructure redesign** that reduced cloud costs by 80% while improving system performance and scalability
- **Architected micro-frontend architecture** using React, enabling team autonomy and faster deployment cycles
- **Designed and deployed microservices** on AWS and Mulesoft Anypoint middleware, handling 100K+ daily transactions
- Led engineering team, conducting technical reviews, mentoring junior developers, and driving SOLID principles adoption

## **Senior Software Engineer** (Aug 2020 – Aug 2022)

- Developed cross-platform mobile application using React Native, MobX, and Firebase, serving 50K+ users
- Created NestJS micro-service template adopted as standard across backend teams
- Mentored 4 interns/trainees through onboarding and skill development programs
- Managed release pipeline from internal testing to Google Play Store production releases

## **Ather Energy Private Ltd.** Bengaluru, KA |Jun 2015 – Aug 2020

### **Senior Software Engineer (Associate Manager)**

- Designed vehicle navigation system using vanilla JS/React and Google Maps API, optimized for hardware with severe memory constraints across the Ather scooter fleet
- Built mobile app using React Native + Firebase for vehicle-cloud sync, achieving 4.6★ app store rating with 100K+ downloads
- Developed Go-lang integrations for system-level vehicle applications
- Created automation tools using shell scripting, reducing QA testing time by 40%

## **Function Space** Bangalore, KA |May 2014 – Jun 2015

### **Software Artisan**

- Built web applications and online community platform (PHP/JavaScript), including Learnise — a learning ecosystem with in-browser IDEs — and Play Physics, a suite of interactive science learning games

## **Avinashi Ventures Pvt Ltd** Surat, GJ |Jun 2013 – Apr 2014

### **Fullstack Software Developer**

- Built HRMS system (AngularJS, Node.js, MongoDB), bulk SMS telemarketing delivery system, and automated mail reporting with charts — foundational full-stack experience spanning frontend, backend, and integrations

## **Education**

### **Bachelor of Engineering: Computer Engineering** (2009 – 2013)

Gujarat Technological University, Surat, GJ

CGPA: 8.05
